Technology

“Oral fluid technology, random testing, & INTERNET software reduced our positive rate from 7% to 0.8%, and generated \$20 million dollars of savings.”

\$50B INTERNATIONAL CORPORATION

## Navigent3's IDAP INTERNET DRUG POLICY MANAGEMENT SYSTEM

Technology that's easy, yet smart; an affordable solution with everything in one place for drug and alcohol testing. What could be more convenient than that?

Navigent3's IDAP integrates INTERNET drug testing data management for random selection and all complementary testing modes & activities with innovative oral fluid on-site screening. Also maintain your requisite tradition DOT urine testing in the same location to assure accurate, traceable implementation and corporate-wide compliance.

Enjoy the convenience of accessing data & resources over the Internet: manage personnel data, release drug test results, import EDI data from the lab, MROs or TPAs, generate random selections, and manage workflow and information exchange.

Access your account and manage your work from anywhere. With oral fluid you can also virtually test anywhere. It's the definition of convenience.

## advice and planning

**WE TAKE A TEAM APPROACH TO ADVISING CLIENTS ON THE RIGHT DRUG FREE WORKPLACE STRATEGIES AND DEVELOPING A SOUND CORPORATE PROGRAM**

*We provide consultative support services to help establish, support, and monitor the effectiveness of a corporate drug and alcohol policy - employee drug education, manager/supervisor training, audits, laboratory confirmatory testing services, medical review officer services, ROI / cost-benefit planning and calculation.*

- Drug Policy Development or Review
- Employee Substance Abuse Awareness
- Substance Abuse Recognition
- Senior Management Consensus-building
- Vendor Evaluation / Selection
- Drug Test Administrator Training
- Drug Test Administrator Certification
- Implementation Services & Support
- Substance Abuse Audit Baseline Study
- Substance Abuse Program Audit
- Financial Impact Analysis
- Drug Free Workplace Program ROI Projection

## Capabilities

Secure access is assured with unique user IDs and password, and data transmissions via 128 bit https encryption technology.

- Drug Test Reporting Online
- Secure Login: Administrators
- Secure Login: Clients | DERs
- Random Selection Software Utilities
- Billing Utilities
- EDI: Retrieve Electronic Results
- Quest, MedTox, CRL, LabCorp ...
- Web-Based Reporting
- Consortium Management
- Support for Third Party Administrators (TPAs)
- Support for Medical Review Officers (MROs)
- Compliant with DOT Testing

Manage your business, achieve YOUR objectives for a Drug Free Workplace, vs. outdated processes, as well as document your DOT compliance where necessary.

The Electronic Data Interchange (EDI) utilities manage data retrieved from the confirmatory Laboratory and MRO to eliminate redundant data and reduce paperwork.

An integrated approach that makes the implementation of a drug free workplace program more accurate and efficient.
